SIVADURGA KONDAPALLI

Kurichedu, Andhra Pradesh, India | sivadurgakondapalli@gmail.com | +91 9177139110 | linkedin.com/in/siva-durga-kondapalli

SUMMARY

Power BI Developer with close to 3 years of experience across Power BI Desktop/Service, DAX, Power Query (M), SQL/T-SQL, SSMS, and Snowflake. Skilled in Paginated Reports (SSRS/Report Builder), semantic modeling in Tabular Editor, Row-Level Security (RLS), performance tuning, and legacy-to-cloud migrations (SQL Server to Snowflake) with zero disruption — plus automation via Power Automate and Python. Snowflake SnowPro Core and AWS Certified Cloud Practitioner certified.

EXPERIENCE

Software Engineer — *HCLTech, Chennai, India* *Jan 2025 – Present*

- Resolved data governance failures in production Paginated Reports by consolidating 4 redundant date-hierarchy columns into 1 base column and adding dynamic, selection-based query logic across a 6-tablix report.
- Reduced dashboard visual load times by up to 95% via query-level coarse-grained filtering (one visual: ~60s to 2-3s) and DAX optimization of boolean flag measures used in visual-level filtering (e.g., 12s to 3s, 10s to 4s).
- Developed end-to-end Power BI reports containing multiple dashboards with dynamic parameters and Row-Level Security (RLS), enabling stakeholders to track key metrics and make data-driven decisions.
- Modernized legacy SSRS/paginated reports by migrating from SQL Server (via SSMS) to Snowflake and a centralized semantic model built in Tabular Editor, preserving full validation and functional parity with zero disruption.
- Led root-cause analysis for data-mismatch incidents reported by business users, tracing discrepancies across the semantic model, SSMS, Snowflake, Sigma, and report layers through rigorous multi-level validation.
- Automated reporting operations using Power Automate — scheduled paginated report delivery around native subscription limits caused by dynamic parameters, plus an event-driven flow that triggers semantic model refreshes and notifies stakeholders on completion.
- Engineered Python automation for T-SQL-to-Snowflake SQL dialect conversion (mapping-document-driven, handling table/column renaming and aliasing) and automated CSV/data validation, reducing manual comparison effort.

Graduate Engineer Trainee — *HCLTech, Chennai, India* *Dec 2023 – Dec 2024*

- Migrated legacy SSMS and Excel-based reports to Power BI, Snowflake, and semantic models while implementing new business requirements and enhancing reporting capabilities.
- Designed multi-layer Power BI dashboards with bookmark-driven navigation and custom buttons to control visibility, using Power Query (M) transformations to improve usability.
- Optimized SQL solutions using views, CTEs, and stored procedures in SSMS to support reporting requirements and improve data processing efficiency.
- Contributed to migrating a legacy COBOL-based system to Python, resolving tool-generated code defects and building automated validation processes to ensure data integrity.
- Delivered a Power Platform solution (Power Apps, SharePoint, Power Automate) to streamline cross-functional workflow management — requests, approvals, reviews, and conditional feedback loops across stakeholder roles.

PROJECTS

Blinkit Sales Analysis Dashboard — Power BI

- Cleaned and transformed data in Power Query (M); built dynamic filters, KPIs, and custom DAX measures for total sales, average order values, and customer ratings.
- Built an interactive dashboard with cards, charts, slicers, and drill-through; implemented Row-Level Security (RLS) to restrict data access by user role.

COVID-19 Data ETL Pipeline — Azure Data Factory

- Self-taught Azure Data Factory (ADF) and built ETL pipelines with source/sink datasets and data flow transformations for public COVID-19 datasets.

EDUCATION

B.Tech, Electronics and Communication Engineering — Narasaraopeta Engineering College, Andhra Pradesh, India · May 2023

CERTIFICATIONS

Snowflake SnowPro Core Certification (Jan 2027) • AWS Certified Cloud Practitioner (Jun 2027) • Microsoft Certified: Azure Fundamentals (Dec 2024)

SKILLS

Power BI & Visualization: Power BI Desktop, Service, Premium; Dashboards, Reports, Paginated Reports; Report Builder; Row-Level Security (RLS); Deployment Pipelines; Sigma Report Development

Data Modeling & Optimization: DAX, DAX Optimization, Tabular Editor, Semantic Data Modeling, Dimensional Modeling, Star Schema, SSAS, Query Optimization, Performance Tuning

ETL & Data Integration: Power Query (M), ETL/ELT, Dataflows, SSIS, Data Warehousing, Data Integration, Multi-Source Connectivity

SQL & Cloud Services: SQL, T-SQL, Advanced SQL, SSMS, SQL Server, Snowflake, Azure (Synapse, Data Factory), AWS, CTEs, Window Functions, Stored Procedures, Views, Data Profiling

Automation: Power Automate, Power Apps, SharePoint, Python, Workflow Automation

Business Intelligence & Analytics: Business Intelligence, Data Analytics, Data Governance, KPI Development, Data Storytelling, SSRS Reporting, Root Cause Analysis (RCA), Data Validation & Quality Assurance, Legacy System Migration, Cloud Migration, Data Cleansing

Soft Skills & Methodologies: Communication, Stakeholder Collaboration, Problem-Solving, Agile, Documentation, Requirements Analysis
